Checklist: Assessment 1, Data Journalism Article

Your question and article

- [ ] Choose your own political question.
- [ ] Choose your data from YouGov's political trackers.
- [ ] Link your topic to contemporary events.
- [ ] Write for a general audience.
- [ ] Write a headline identifying your question or main finding.
- [ ] Build a clear argument.
- [ ] Use short paragraphs.

Your analysis and figures

- [ ] Explain where your data come from.
- [ ] Explain what your data measure.
- [ ] Describe the population your data cover.
- [ ] State the dates your data cover.
- [ ] State the sample size.
- [ ] Use R to analyse your data.
- [ ] Create **at least one original figure** using `ggplot2`.
- [ ] Give each figure a clear title.
- [ ] Give each figure readable labels.
- [ ] Include units as appropriate.
- [ ] Include dates or groups as appropriate.
- [ ] Identify the data source in each figure's caption.
- [ ] Export each figure using `ggsave`.
- [ ] Insert the exported figure or figures into your article.
- [ ] Do not use screenshots of RStudio or copy figures from other publications.
- [ ] Explain what each figure means for your argument.
- [ ] Explain what your findings mean for the political issue.
- [ ] Explain what the data show.
- [ ] Explain what the data leave unresolved.
- [ ] Explain choices that might affect how you interpret your results.

Sources and references

- [ ] Cite **at least two academic journal articles or academic books**.
- [ ] Use this research to explain the issue or interpret your findings.
- [ ] Quote from the research, or discuss it and link to the original source.
- [ ] Include a reference list of every academic source you use.
- [ ] Give each source's author, date, title, publication or website, and a link.
- [ ] Use Harvard format for the reference list.

Before you submit

- [ ] Check your article is **1,000 words ± 10%**, excluding the reference list.
- [ ] Include your word count.
- [ ] Put your student ID in your work.
- [ ] Do not include your name.
- [ ] Do not submit your data.
- [ ] Save your work as **one PDF**.
- [ ] Use your student ID as the filename.
- [ ] Use your student ID as the submission title.
- [ ] Upload your PDF to Canvas.
